Sai Charan K

Software Engineer | Java | Spring Boot Microservices | Kubernetes | GitLab CI/CD | React

Greater Chennai Area

Summary

I’m a Software Engineer working mainly with Java and Spring Boot, building and supporting enterprise applications and backend services.Most of my work revolves around building REST APIs, handling business workflows, connecting different services, and improving existing applications. I also spend a lot of time debugging, understanding what actually went wrong, following the issue through the system, finding the root cause, and working with the right teams to get it fixed.I’ve worked on enterprise client onboarding applications, contributing to different parts of the application from development and integrations to debugging, production support, and ongoing enhancements application migration activities.Something that naturally shapes the way I work is that I don’t really like doing the same thing repeatedly when there’s a better way to do it. If I come across a manual process, repetitive testing, too many steps, or something that leaves too much room for human error, I usually start thinking about how it can be made easier.That has pushed me to build automations, improve testing processes, explore AI tools, and find better ways to handle debugging and everyday engineering work. I’ve also worked on simplifying configuration and deployment-related tasks where a little automation can save a lot of repeated effort.I enjoy finding these small problems that people deal with every day but rarely have time to fix and then using technology to remove some of that friction. That’s what keeps me interested in backend engineering, automation, AI-assisted development, integrations, and building things that genuinely make work easier.
Core Skills:Java • Spring Boot • Microservices • REST APIs • Camunda • Azure • Kafka • MySQL • JWT • Docker • Kubernetes • Rancher • NGINX • Git • GitLab • Jenkins • CI/CD • Datadog • Distributed Systems • Event-Driven Architecture • API Integration • React.js • Redux • TypeScript • Micro Frontends • Webpack Module Federation • Performance Optimization • Banking & Financial Services • Agile/Scrum • SDLC • Full Stack Development

Experience

Cognizant

1 year 5 months

Junior Software Engineer

July 2026 - Present (4 months)

Chennai, Tamil Nadu, India

• Contribute to the development and enhancement of a large-scale Client Lifecycle Management (CLM) platform supporting end-to-end client onboarding in the banking domain.

• Develop and maintain Java and Spring Boot microservices and secure REST APIs supporting different stages of the client onboarding lifecycle.

• Implement and support Camunda-based workflow orchestration to manage onboarding lifecycle instances, business processes, and stage transitions.

• Build service-layer integrations between workflow processes, business services, databases, and external enterprise systems for identity verification, account management, and notifications.

• Work with MySQL for persistence and data retrieval, Kafka for asynchronous/event-driven processing, and caching mechanisms to improve application responsiveness and reliability.

• Troubleshoot application, integration, configuration, and runtime issues across environments, collaborating with cross-functional teams to resolve production and deployment-related issues.

• Contribute to the migration of enterprise banking services from on-premises infrastructure to Microsoft Azure, supporting environment configuration, ingress/connectivity requirements, secret management, deployment activities, and application stabilization.

• Work with containerized and cloud environments, gaining hands-on experience with Docker, Kubernetes, CI/CD pipelines, and enterprise application deployments.

• Collaborate with developers, QA, DevOps, and platform teams to deliver features, resolve issues, and support reliable releases across environments.

Software Engineer Trainee
November 2025 - July 2026 (9 months)
Chennai, Tamil Nadu, India

Program Analyst Trainee
June 2025 - November 2025 (6 months)
Chennai, Tamil Nadu, India

Education

Sreenivasa Inst. of Technology & Management Studies, Thimmasamudram, Chittoor

Bachelor of Technology - BTech, Electrical, Electronics and Communications Engineering · (2020 - 2024)
